

GEORGE AND THE GALAXY DEFENDERS

Color George's Duchenne
treatment journey

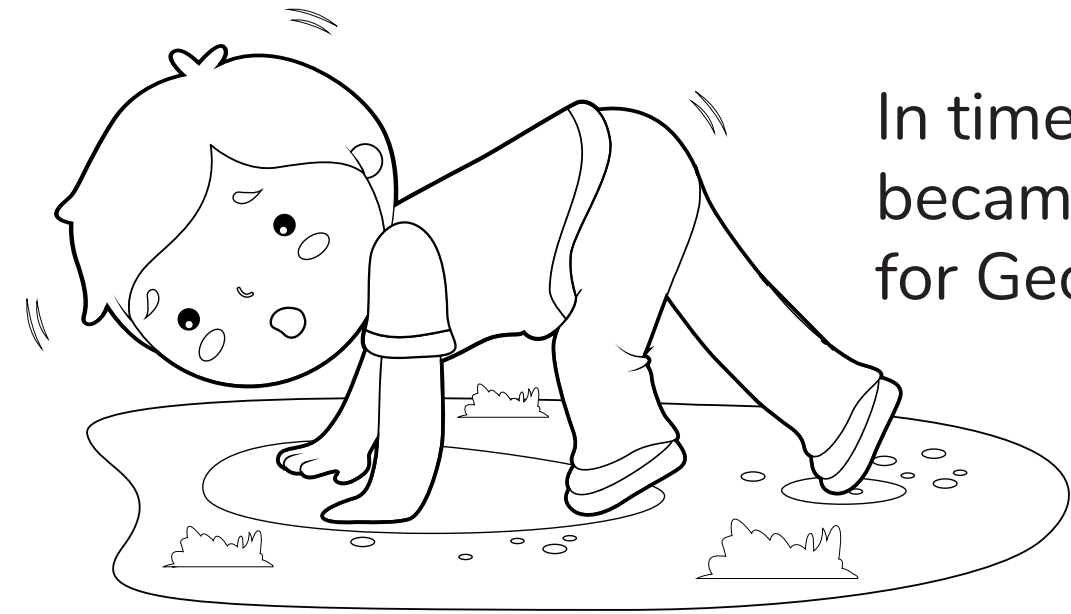

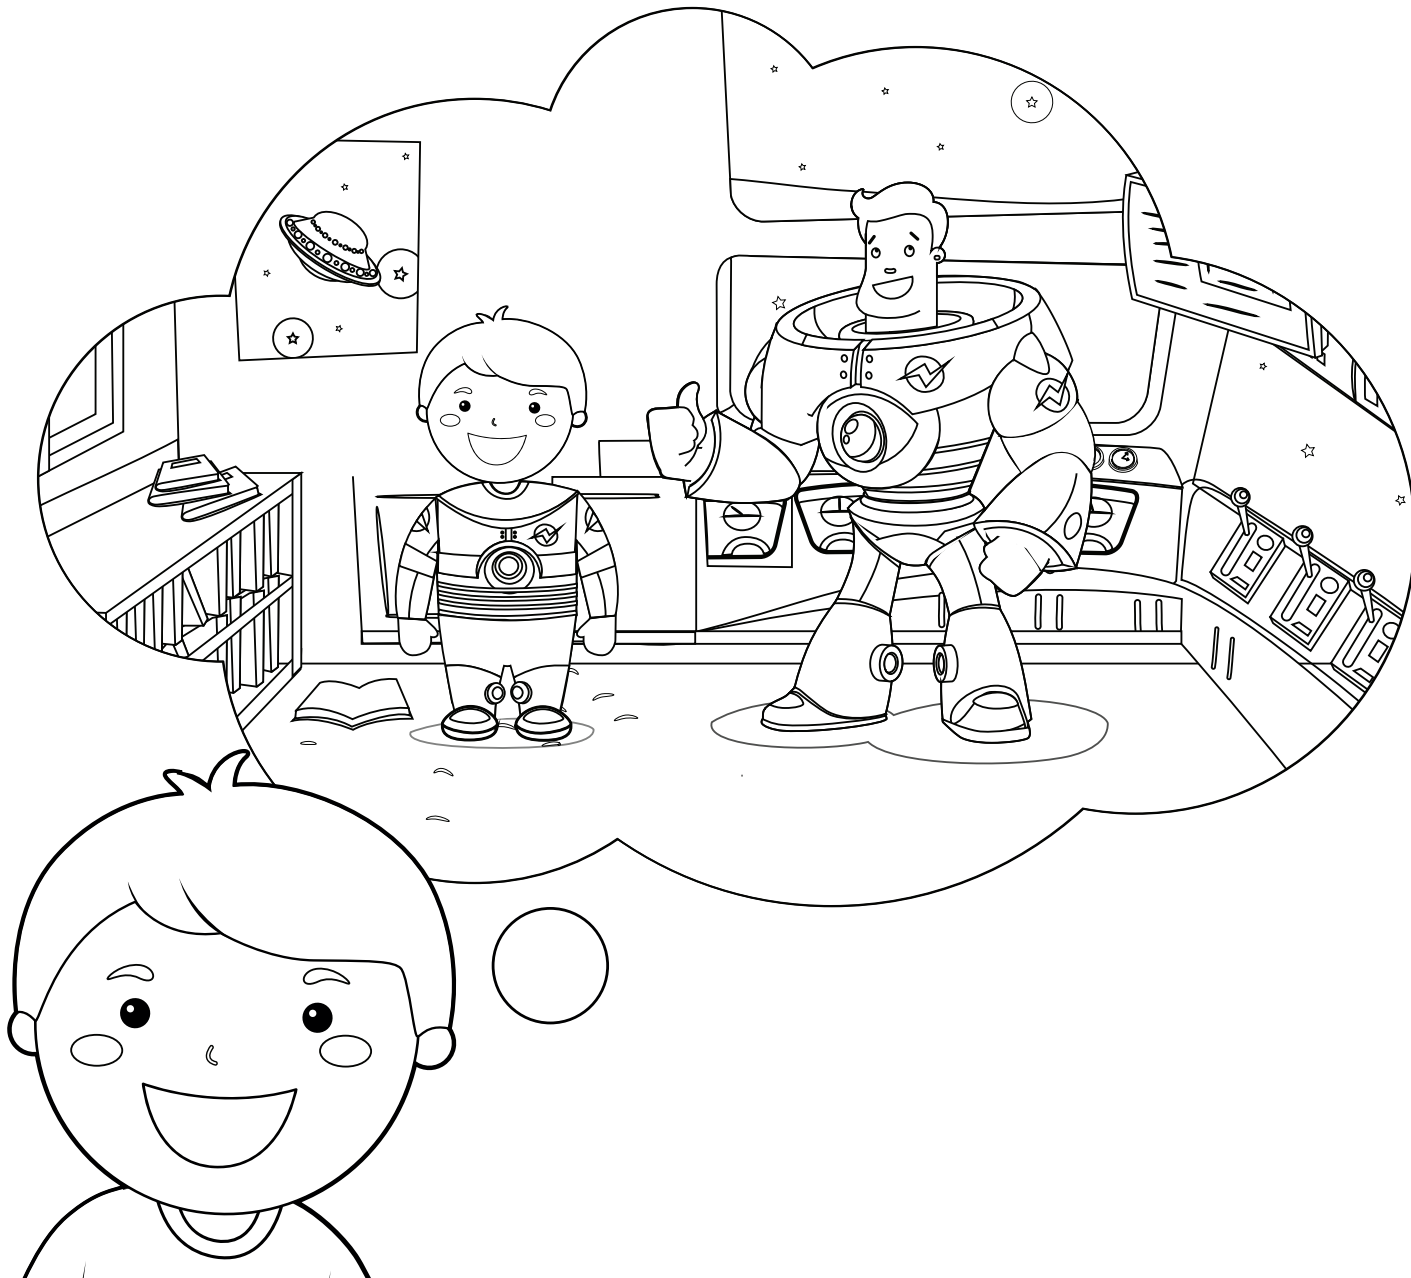

This is George.

George loves playing with his
toy spaceman, Captain Jack.

George and Captain Jack go on adventures
together all the time. They are the
Galaxy Defenders!

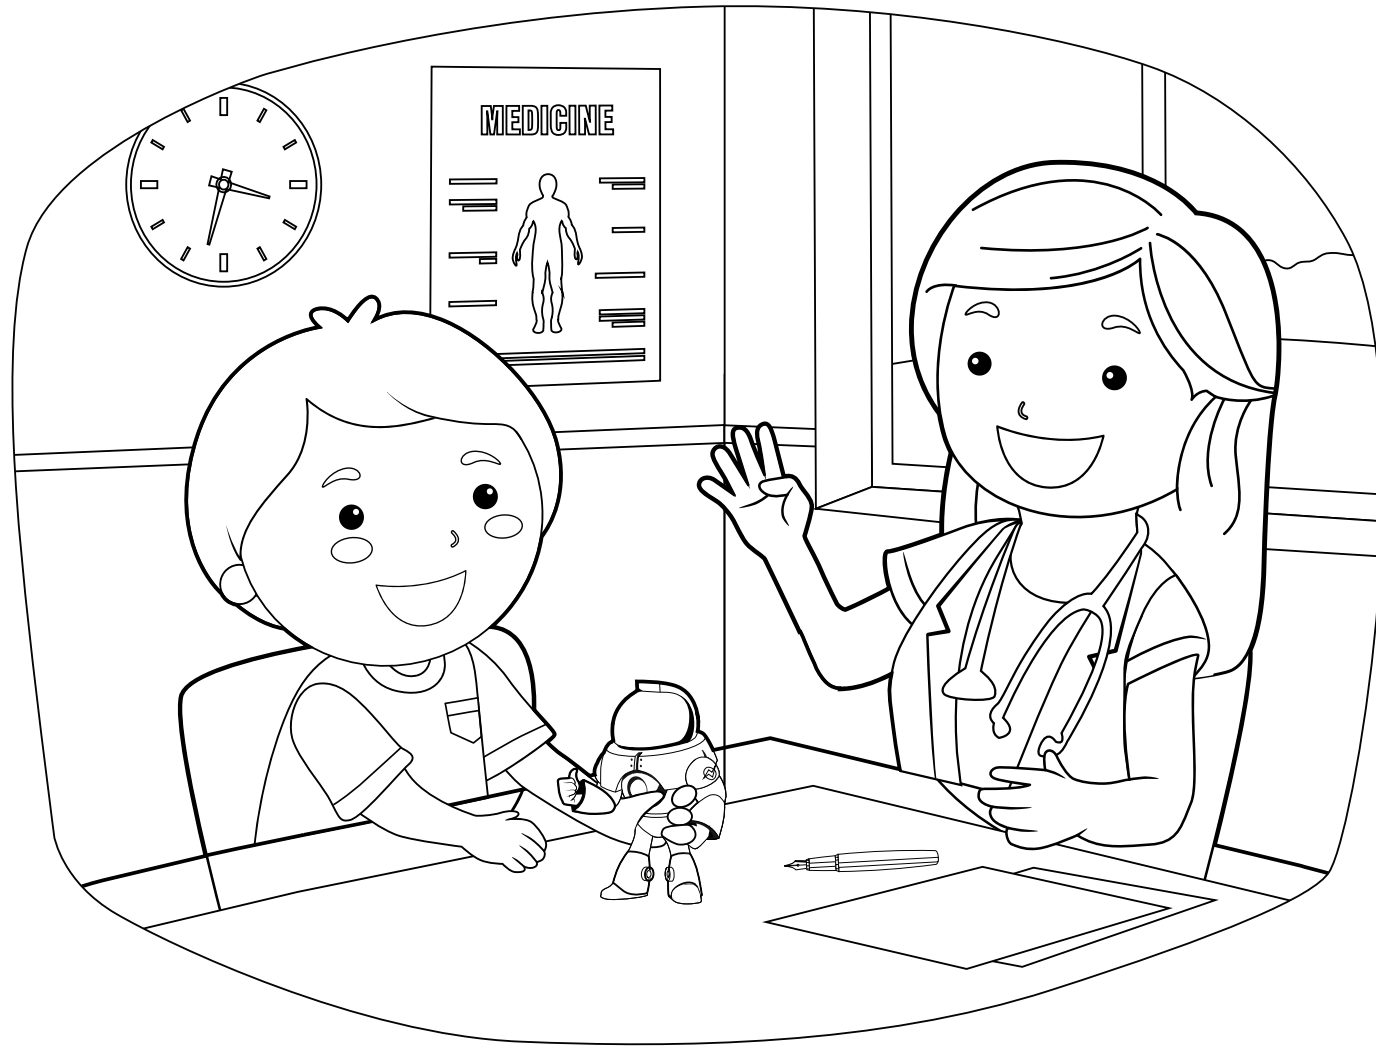

In time, walking
became hard
for George...

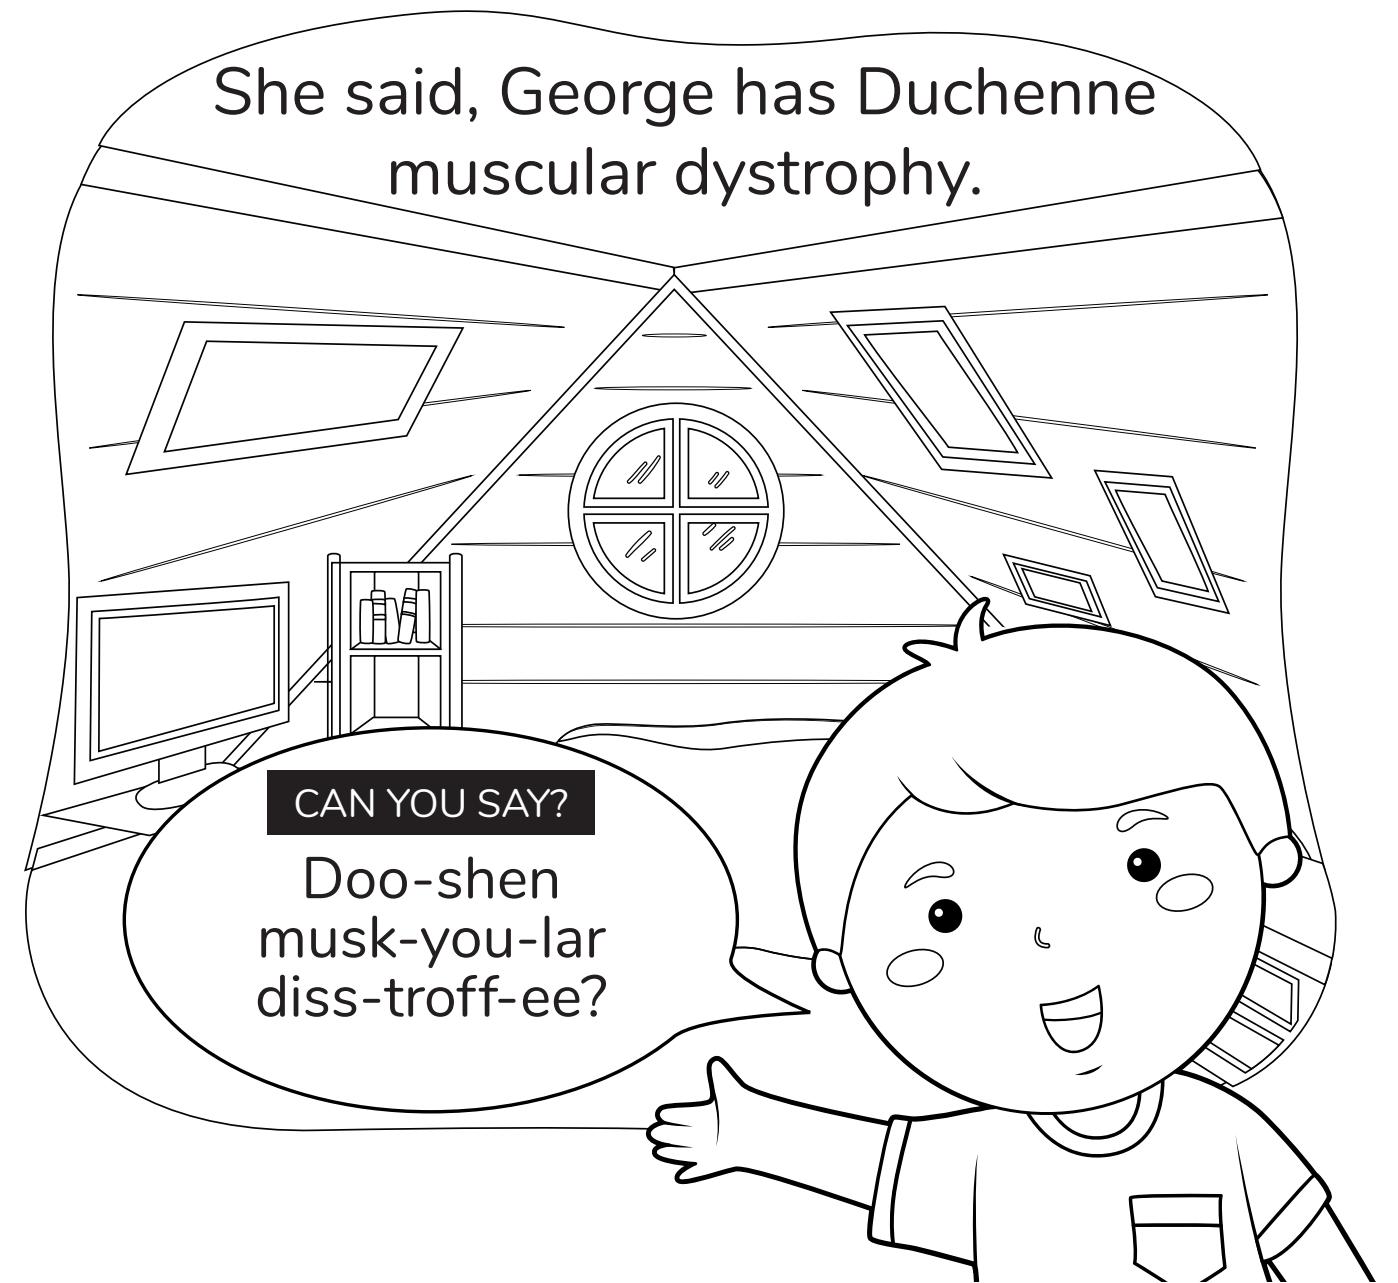

...and he fell
a lot too.

So George's mom took him to see a special doctor.

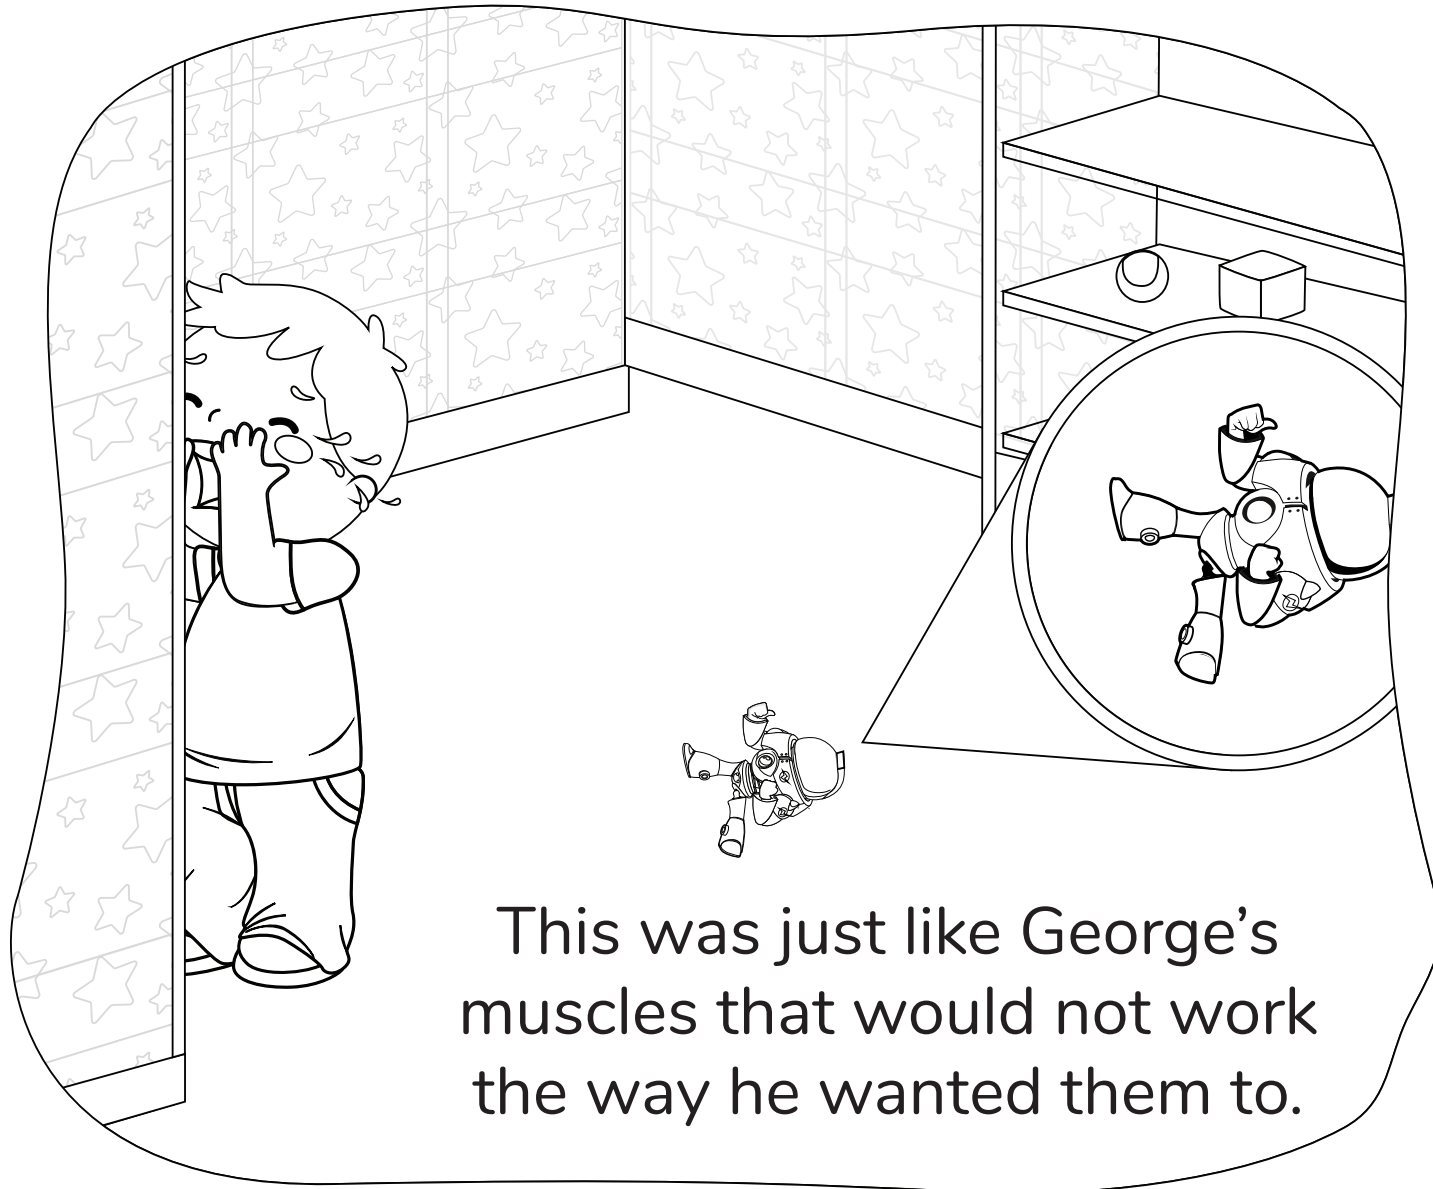

The doctor told George he had a problem with the muscles in his body.

It makes his legs weak and wobbly, and it can even make it hard to breathe and play sometimes.

One day, one of Captain Jack's legs became wobbly too!

This was just like George's muscles that would not work the way he wanted them to.

Was this the end of the Galaxy Defenders?

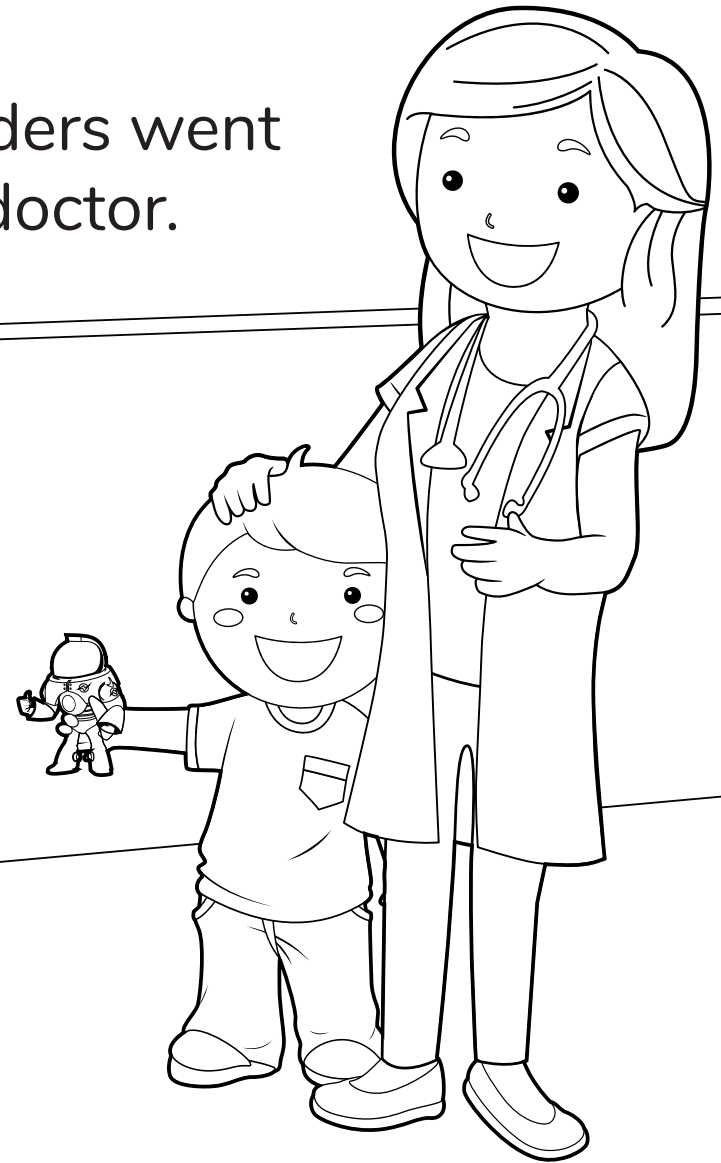

George's dad said he had a special way he could help.

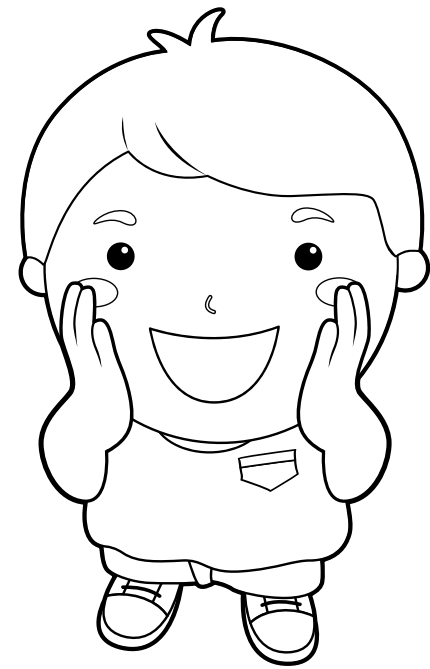

Then, the Galaxy Defenders went back to see the special doctor.

She said that some kids had the same illness as him. And that they took medications that could help.

Dad had some special galactic glue to help stop Captain Jack's legs from getting worse!

George also got to meet someone called a physical therapist.

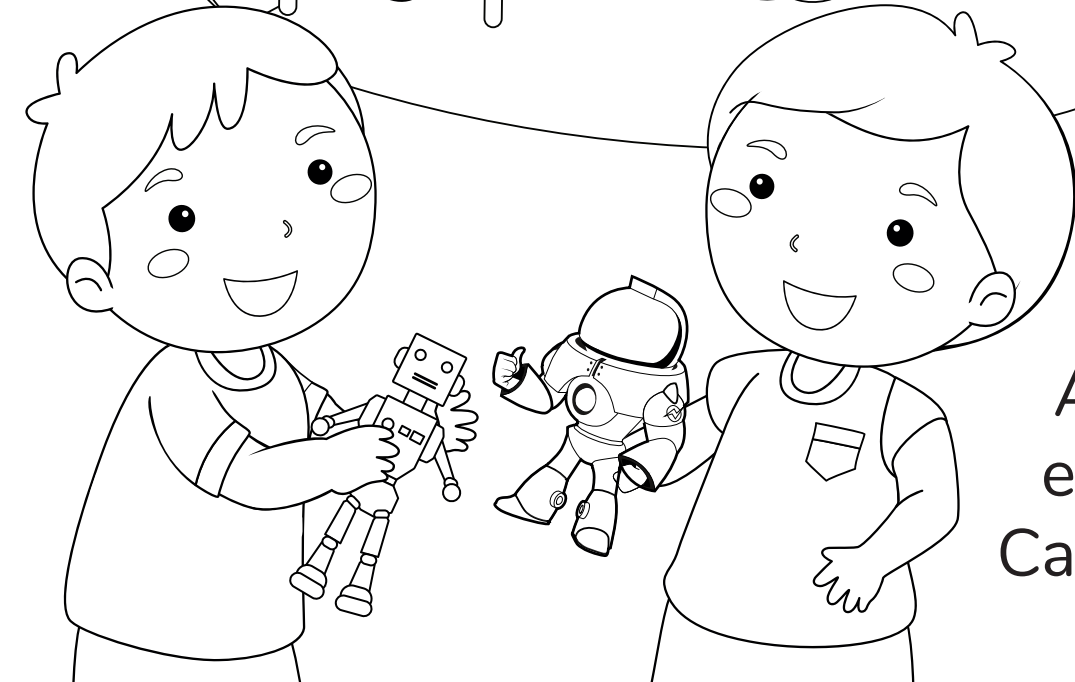

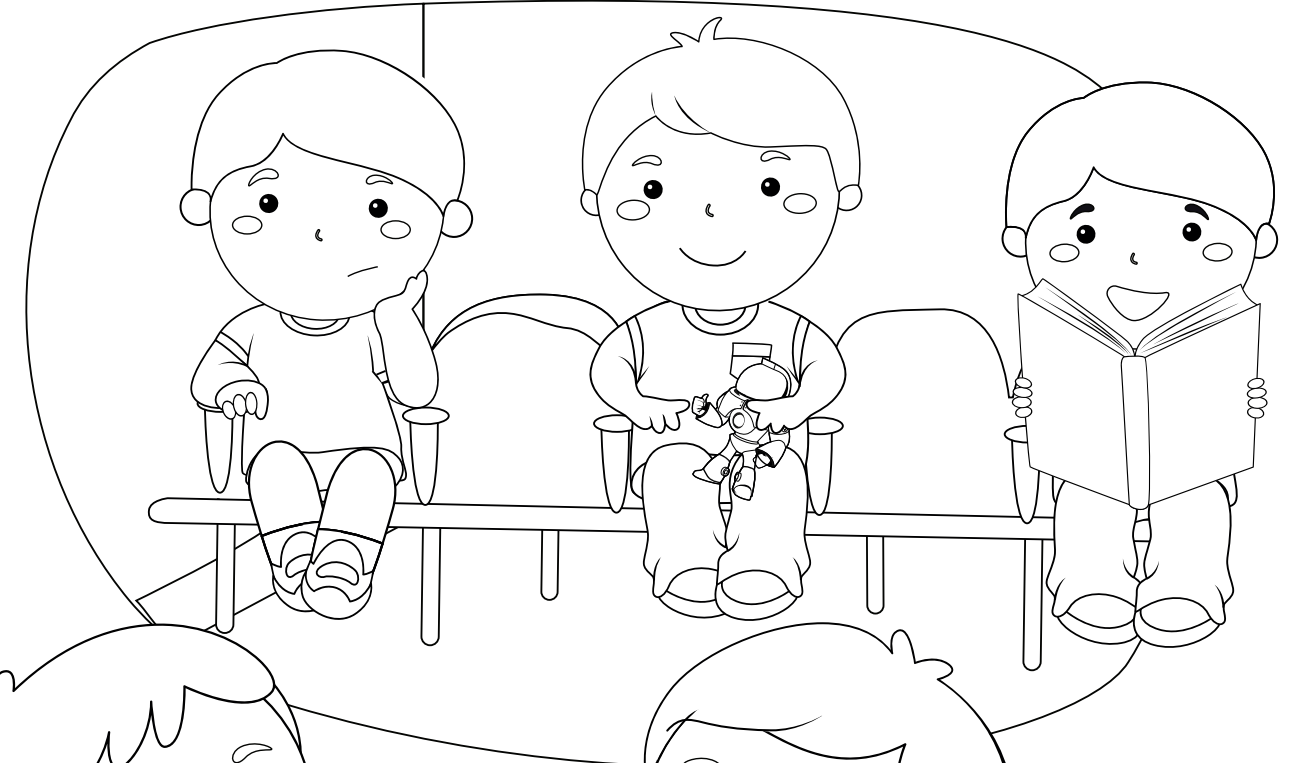

CAN YOU SAY?

Fizz-i-cal
ther-a-pist

They helped George with exercises that would help keep his muscles strong.

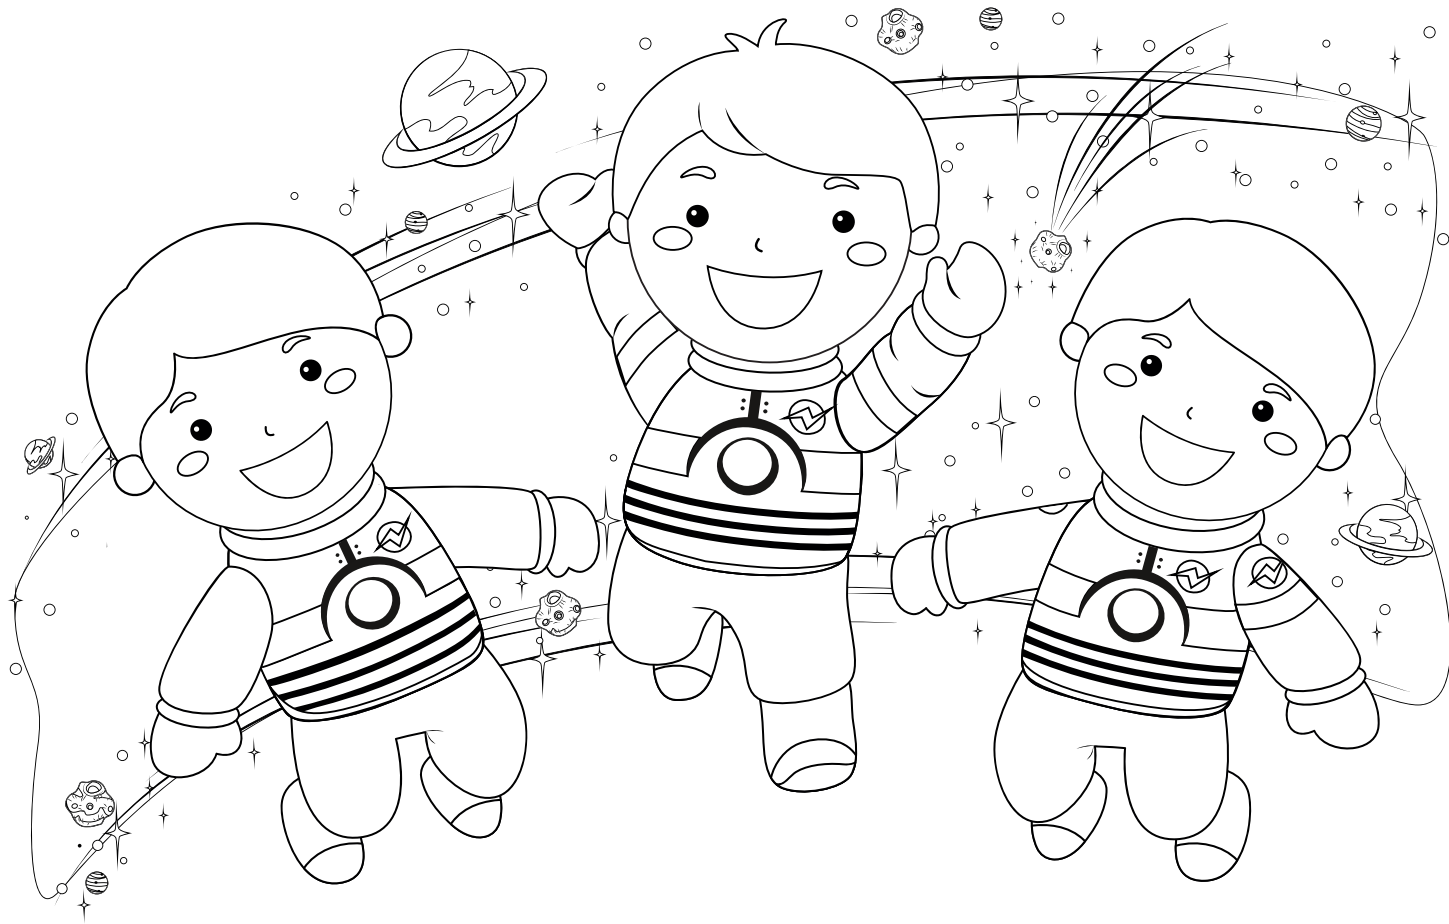

George got to meet some new friends who were just like him!

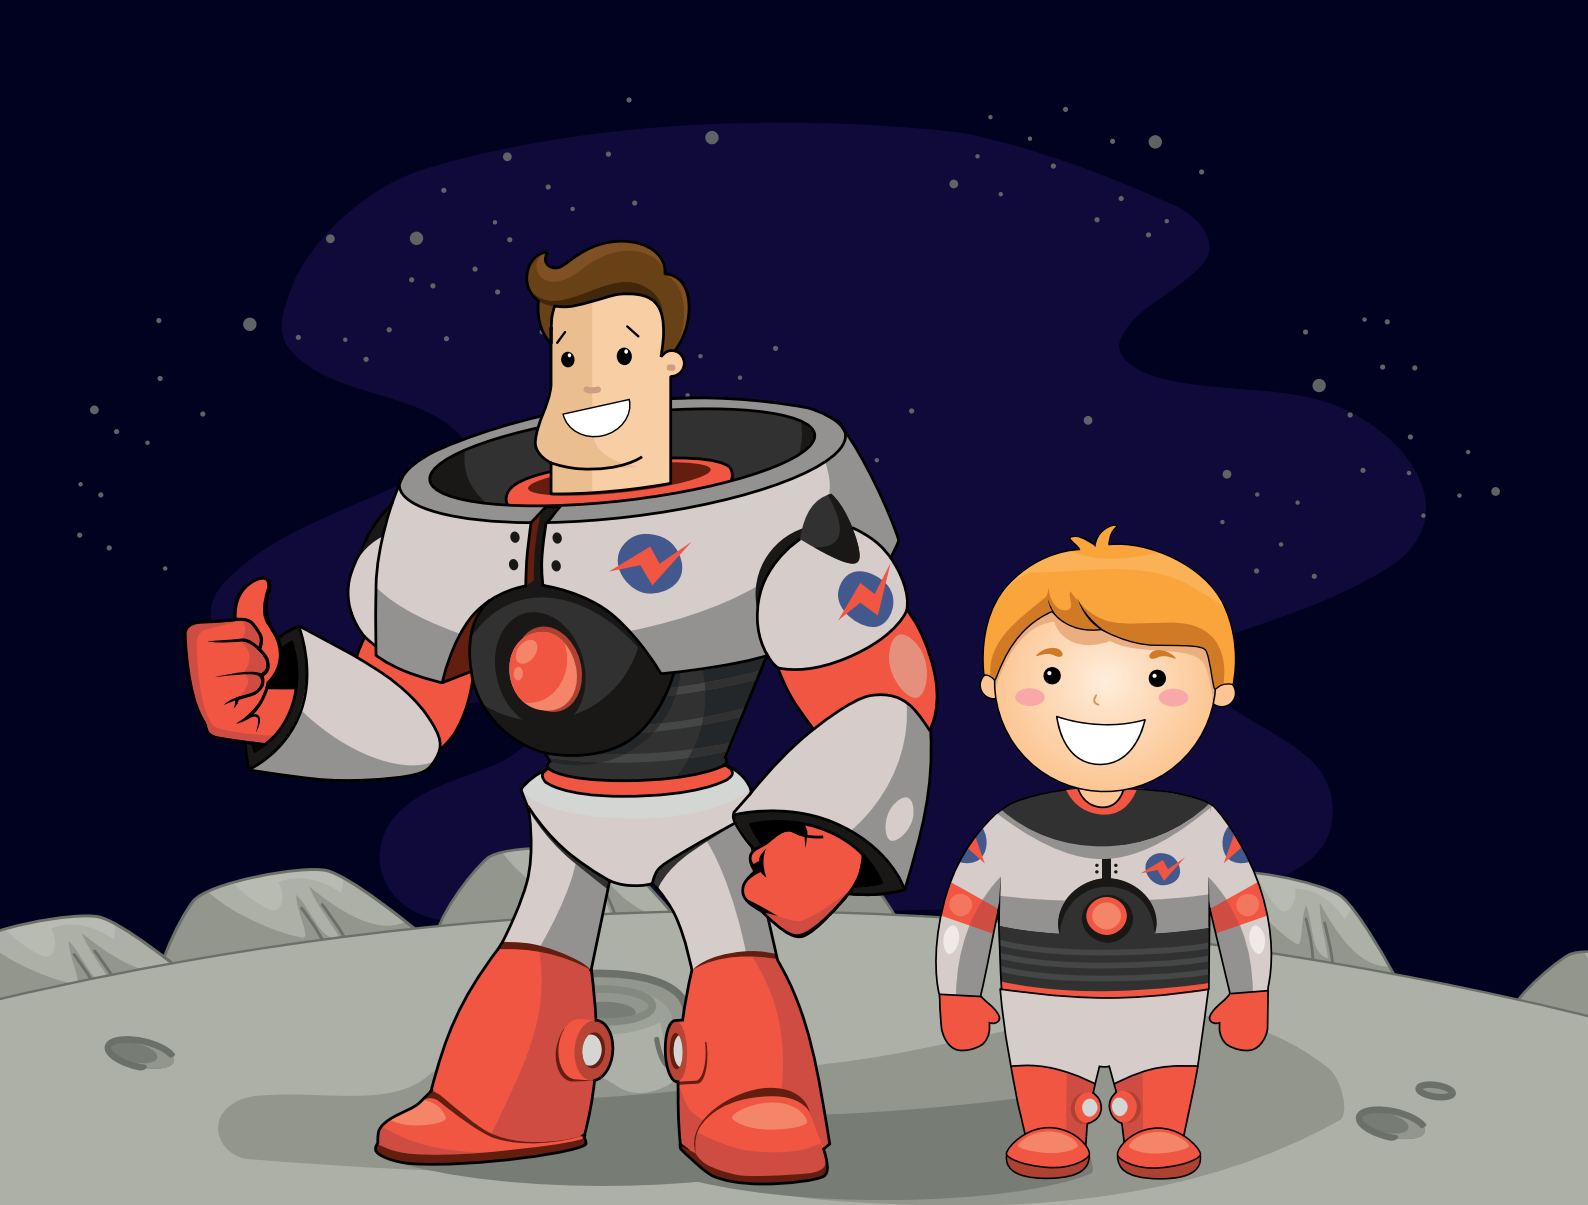

And they even liked Captain Jack.

All of George's new friends wanted to
be part of the Galaxy Defenders!

Together, the Galaxy Defenders
can take on anything!
